SUMMARY

I am a Computer and Network Engineering student with expertise in application development using FlutterFlow and Firebase, database management, and user interface (UI) and user experience (UX) design. With experience from internships and personal projects, I am disciplined, adaptable, and passionate about contributing to software development. I aim to contribute to innovative digital solutions and continue improving my technical and creative skills in software development.

EDUCATION

SMK NEGERI 2 DEPOK – Computer and Network Engineering 2022 - 2025

Final GPA: 90.83

POLITEKNIK NEGERI INDRAMAYU – Software Engineering Now

Currently enrolled

INTERNSHIP

PT. Idemu Sistem Sinergi

July 2024 - December 2024

Programmer

1. Assisted in developing and improving 2+ internal applications using FlutterFlow and Firebase, enhancing system performance and user experience.
2. Designed and optimized Firestore database structures, reducing data retrieval time by approximately 15%.
3. Collaborated with a 5-member programming team to implement new features, resulting in smoother project delivery and improved functionality.

SKILL

1. **FlutterFlow (Application Development):** Able to build and design mobile applications without coding.
2. **Firebase (Database & Authentication):** Skilled in managing databases, authentication, and real-time data.
3. **Networking (RJ45 Cabling & Configuration):** Knowledge in basic computer networking setup.
4. **Good communication and teamwork** skills demonstrated during internship projects.
5. **Time Management:** Able to manage tasks and deadlines effectively.

CERTIFICATIONS

1. Dicoding – Belajar Dasar AI (2025)
2. MikroTik – MikroTik Certified Network Associate (2025)
3. BNSP – Junior Technical Support (2025)
